The demography of England has since 1801 been measured by the decennial national census, and is marked by centuries of population growth and urbanisation. Due to the lack of authoritative contemporary sources, estimates of the population of England for dates prior to the first census in 1801 vary considerably.

Demography of England - Wikipedia

The Population of Britain After the Industrial Revolution. In the 19th century Britain became the world's first industrial society. It also became the first urban society. By 1851 more than half the population lived in towns. The population of Britain boomed during the 19th century. In 1801 it was about 9 million. By 1901 it had risen to about 41 million.
