A new study has shown that the relationship between aging and cancer may be more intimate and complex than previously thought. In fact, some aspects of cellular aging may hinder the development of...

### **Aging and cancer: A surprising two way relationship**

The convergence of an overall aging population and a peak cancer incidence among those aged 65 to 74 will result in a significant rise in the number of people diagnosed with cancer. (Cancer also occurs at a high rate in people older than 75, but at that age people are more likely to die from other medical conditions.)

### **The Challenging Landscape of Cancer and Aging - National ...**

Cancer and Aging Research Group. Welcome to CARG! The mission of the Cancer and Aging Research Group is to join geriatric oncology researchers across the nation in a collaborative effort of designing and implementing clinical trials to improve the care of older adults with cancer. The only requirement for membership is the desire to help older adults with cancer.

### **Cancer and Aging Research Group**

This is a crucial area of study that will only grow in the coming years. Between 2010 and 2030, cancer incidence is expected to rise 67 percent in those age 65 or older, compared to 11 percent for those under age 65. Approximately 60 percent of all cancers occur in people aged 65 years or older.
