Step 2: Configure basic switch parameters. On each switch, configure an IP address on the management VLAN according to the diagram. VLAN 1 is the default management VLAN, but following best practice, we will use a different VLAN. In this lab, VLAN 99 will be used as the management VLAN. DLS1 example:

CCNP SWITCH Chapter 6 Lab 6-3, Gateway Load Balancing ...
Switch ALS1 has been showing CRC errors on a group of eight ports for several days. It was suspected that hardware was the cause. During yesterday evening's maintenance window, the switch was replaced with a similar switch from the lab. After this replacement, clients could connect, and no errors were shown on the ports.

CCNP TSHOOT Chapter 4 Lab 4-2, Mixed Layer 2-3 ...
* A routed switch port can serve as a default gateway for devices. * A routed switch port provides an interface that may provide a Layer 3 connection to a next-hop router. *A routed switch port is a virtual Layer 3 interface that can be configured for any VLAN that exists on a Layer 3 switch.

CCNP Switch v7.1 Quiz - Chapter 5: InterVLAN Routing and ...
What can be inferred from the fact that a switch isreceiving BPDUs on a port but not transmitting BPDUs? The port is a designated port. The port is a root port.* The port is disabled. The port is in listening state. A newly configured switch is connected to an existing network. The instant the trunk link is brought up to the rest of the network ...
