making.

Decision Support, Analytics, and Business Intelligence ...

BUSINESS INTELLIGENCE IN DECISION SUPPORT SYSTEMS. A decision support system (DSS) is a computer-based information system that supports business or organizational decision-making activities; typically this results in ranking, sorting, or choosing from among alternatives. DSSs serve the management, operations, and planning levels of an organization (usually mid and higher management) and help people make decisions about problems that may be rapidly changing and not easily specified in advance.

INTELLIGENCE - WHAT NEEDS TO ...

Difference Between Decision Support System and Business Intelligence is that decision support system helps users analyze information and make decisions. While BI includes several types of applications and technologies for acquiring, storing, analyzing, and providing access to information to help users make more sound business decisions.

Difference Between DSS and BI

Business intelligence tools are essentially data-driven decision support systems (DSS). BI is sometimes used interchangeably with briefing books, report and query tools, and executive information systems. With these tools, business people can start analyzing the data themselves rather than wait for IT to run complex reports.
