organization, GATF reports are objective and fully disclose methodology.

Quality of Digital Color and DI Presses Examined by GATF ...

A system of process control for sheetfed lithographic printing is described. The use of the GATF Sheetfed Color Printing Test Kit to troubleshoot, optimize and characterize a printing system is also addressed. Various tests of color reproduction are suggested, and a procedure for production control is given. The sequence of optimization begins with a diagnostic phase where the mechanical transfer properties of the press are examined.
