Nagios Log Server greatly simplifies the process of searching your log data. Set up alerts to notify you when potential threats arise, or simply query your log data to quickly audit any system. With Nagios Log Server, you get all of your log data in one location, with high availability and fail-over built right in.

Nagios - The Industry Standard in IT Infrastructure Monitoring
Nagios is known for being the best server monitoring software on the market. Server monitoring is made easy in Nagios because of the flexibility to monitor your servers with both agent-based and agentless monitoring. With over 5000 different addons available to monitor your servers, the community at the Nagios Exchange have left no stone unturned.

Our Homepage | And also our piece of online sanity
Well the past 24 - 40 hours have been relative sanity with the stable shared web server ("web") and all 3 DNS servers (Atlanta, Buffalo and Charlotte) all playing nice together. There has been no odd packet loss, no downtime, no flapping networking issues, no nothing... peace and quiet, beautiful sanity and I have no idea what is going on.
