Precision medicine aims to customize health care, with decisions and treatments tailored to each individual in every way possible. Pharmacogenomics is part of precision medicine. Although genomic testing is still a relatively new development in drug treatment, this field is rapidly expanding.

Precision medicine and pharmacogenomics - Mayo Clinic

To support the implementation of pharmacogenetics, the Royal Dutch Association for the Advancement of Pharmacy (KNMP) installed a multidisciplinary working group with the objective to develop pharmacogenetics-based therapeutic (dose) recommendations based upon a systematic review of the literature and to assist prescribers by integrating the recommendations into computerized systems for prescribing and automated medication surveillance . These data are electronically available to all ...
