## **Psychiatric interview - Wikipedia**

The psychiatric interview is a key diagnostic instrument for psychiatrists given that laboratory exams do not provide evidence for psychopathologic processes. Psychiatry derives its practice from clinical observations that take place in face-to-face encounters between patient and doctor where thought, language, and communication disorders are closely investigated.

## **Psychiatric Interview - an overview | ScienceDirect Topics**

The Psychiatric Interview Clinical interviewing is the single most important skill required in psychiatry. The interview constitutes the principal means for gaining an understanding of a patient's difficulties. This understanding leads to a diagnostic formulation and the development of treatment plan.
