Whole Numbers Trivia - Math Worksheets 4 Kids

The set of whole numbers include the natural numbers and 0. Suppose we call this set W, then $W = \{ 0,1,2,3,4,5,6,\dots \}$. Natural number, also called counting numbers, are 1, 2, 3, 4... The number line above only shows whole numbers from 0 to 10.

What are Whole Numbers ? Definition, Facts, and Examples.

Rounding whole numbers to the nearest ten When rounding to the nearest ten, if the last digit ends with 1, 2, 3, or 4, round to the next number that is smaller than the number given and ending with a zero. For instance, round 43 to the nearest ten. The last digit is 3, so the next number smaller than 43 with an ending of zero is 40.

Rounding Whole Numbers - Basic-mathematics.com

Possible answer: The number 2 is 10 times the value of 0.2 because 2 is 10 times as far from 0 as the distance from 0.2 to 0. Answers will vary. Possible answer: I liked using decimal grids to see the relationship between each decimal number and 1 whole, but I thought it was easier to show the distance of numbers from 0 on a number line. 1 10 10 10 10 10

Grade 5 Mathematics - Microsoft

In a whole number, the digit farthest to the right is always in the ones place. The next farthest to the right is in the tens place. The remaining digits continue to fill in the place values until there are no digits left.
